

Homeowner Lead Agent Blueprint v1

#Objective

Automate lead engagement from first touch to proposal-ready status, while keeping outreach compliant, human, and non-annoying.

#Stack Context

- Intake: Canopy Connect
- Agency workflow/quoting: QuoteRUSH (+ Client Dynamics)
- Messaging/orchestration: OpenClaw agents + cron + channel routing

#1) Agent Architecture (5-agent model)

##A) Lead Intake Agent

Role: Start conversation and gather quote-ready data.

Triggers:

- New lead from Canopy / ad / partner / expired database import

Actions:

- Send first-touch SMS/email
- Ask structured questions in sequence
- Confirm missing fields
- Mark lead 'quote_ready' when minimum data complete

Output:

- Structured lead payload + status update in QuoteRUSH/CRM

##B) Follow-Up Agent

Role: Persistent but polite follow-up until engagement or timeout.

Triggers:

- Lead in 'new', 'incomplete', 'quoted-not-bound'

Actions:

- Execute cadence (below)
- Personalize by source (partner/ad/reactivation)
- Pause/stop on response, bind, opt-out

Output:

- Next-touch task, engagement score, do-not-contact flags

##C) Proposal Orchestration Agent

Role: Move quote-ready leads to proposal quickly.

Triggers:

- Lead status changes to 'quote_ready'
- Producer task overdue

Actions:

- Notify assigned producer/CSR
- Enforce SLA timers
- Remind until quote sent
- Trigger post-quote follow-up sequence

Output:

- Reduced lead-to-quote time, fewer stalled files

##D) Compliance Guardrail Agent

Role: Keep all outreach compliant and safe.

Triggers:

- Before every outbound message/call task

Actions:

- Validate DNC/TCPA/opt-out/quiet-hour rules
- Block disallowed channel
- Log consent and suppression events

Output:

- Pass/block decision + audit log

##E) Pipeline Coach Agent

Role: Management visibility + next best actions.

Triggers:

- Daily 8 AM + mid-day + end-of-day

Actions:

- Summarize stuck leads
- Rank top opportunities
- Recommend today's top actions (Todd + team + Henry)

Output:

- Clear daily execution priorities

#2) Lead Lifecycle States

1. 'new'
2. 'contact_attempted'
3. 'engaged'
4. 'incomplete_data'
5. 'quote_ready'
6. 'quoted'
7. 'followup_post_quote'
8. 'bound'
9. 'lost'
10. 'do_not_contact'

#3) Minimum Data Required for a Quote Ready

- Full name
- Property address
- Email + mobile
- DOB
- Prior/current carrier info (if available)
- Coverage intent / occupancy basics
- Preferred effective date

(Adjust by line/state as needed.)

#4) Follow-Up Cadence (non-bothersome default)

##If no response:

- T0 (immediate): Intro + quick value + link
- T+1 day: gentle reminder
- T+3 days: value message (coverage/rate angle)
- T+7 days: a still want help? checkpoint
- T+14 days: final nudge + archive option

##Rules:

- Max 5 touches in 14 days
- Stop immediately on opt-out
- Pause when engaged
- Resume only if lead goes cold after X days

#5) Message Policy

##Tone

- Helpful, local, concise
- No pressure language
- One CTA per message

##Channel order

- 1) SMS (fastest response)
- 2) Email (detail/supporting info)
- 3) Human call task (if high intent or quote-ready stall)

#6) Compliance Controls (must-have)

- Quiet hours by lead timezone
- DNC suppression list check pre-send
- TCPA consent check for SMS/calls
- Auto-honor STOP/UNSUBSCRIBE
- Full outbound/inbound event logging

#7) Scoring Model (simple v1)

- +3 responds to message
- +4 completes key intake fields
- +5 requests quote today
- -3 no response after 3 touches
- -5 explicit not interested
- -10 opt-out

Use score to prioritize producer effort.

#8) KPI Dashboard (weekly)

- New leads
- Contact rate
- Response rate
- Quote-ready rate
- Lead-to-quote time
- Quote-to-bind rate
- Unsubscribe rate
- Overdue follow-up count
- Revenue per lead source

#9) 14-Day Implementation Plan

##Days 1â 3

- Define fields + state machine
- Build compliance checks
- Build first-touch templates

##Days 4â 7

- Enable intake + follow-up agents
- Connect status updates to QuoteRUSH
- Start pilot with one source (e.g., ad leads)

##Days 8â 10

- Add proposal orchestration + SLA reminders
- Activate daily pipeline coach summary

##Days 11â 14

- Tune cadence based on response/opt-out
- Expand to partner + expired lead segments

#10) Human-in-the-loop points

- Producer approval before final proposal send (optional policy)
- Manual takeover trigger on high-value leads
- Escalation queue for confused/complex replies
