

QuoteRUSH Lifecycle Map (Homeowner Pilot)

#Objective

Standardize lead progression in QuoteRUSH so automation, producers, and reporting all use the same status logic.

#Lifecycle Stages

1. New
2. Contact Attempted
3. Engaged
4. Quote Ready
5. Proposal Sent
6. Won / Lost

#Stage Definitions + Entry Criteria

#1) New

Definition: Lead created/imported; no outbound attempt yet.

Enter when:

- New lead arrives from Canopy/form/manual import.

Required fields on entry:

- Lead name
- Primary contact method (phone/email)
- Source/campaign
- Assigned owner

Auto-actions:

- Create first-touch task
- Set SLA timer (first contact within 15â 30 min during business hours)

#2) Contact Attempted

Definition: At least one outbound attempt made; no two-way response yet.

Enter when:

- SMS/email/call attempt logged.

Required fields:

- Attempt timestamp
- Channel used
- Attempt count

Auto-actions:

- Schedule next follow-up based on cadence
- Suppress if opt-out or DNC flag

#3) Engaged

Definition: Lead responds or active conversation starts.

Enter when:

- Reply received (SMS/email/call) OR
- Appointment/meeting event set

Required fields:

- Engagement channel
- Last response timestamp
- Next action owner/date

Auto-actions:

- Pause generic drip sequence
- Trigger intake completion workflow

#4) Quote Ready

Definition: Required underwriting/intake fields complete for quoting.

Enter when (all true):

- Required Canopy intake fields complete
- Contact info validated
- Target policy details captured

Required fields (minimum):

- Property address
- Current carrier (if known)
- Renewal/effective date
- Any major risk notes (roof/updates/claims context)

Auto-actions:

- Create producer quoting task
- Start quote SLA timer

#5) Proposal Sent

Definition: Formal quote/proposal delivered to prospect.

Enter when:

- Proposal/quote package sent via approved channel.

Required fields:

- Proposal sent date/time
- Premium/option summary (or proposal reference)
- Follow-up due date

Auto-actions:

- Schedule proposal follow-up sequence
- Notify owner at stale threshold (e.g., no response 48h)

#6) Won / Lost

Won Definition: Policy bound/accepted.

Lost Definition: Deal closed-lost (with reason).

Enter Won when:

- Bind confirmation recorded.

Enter Lost when:

- Explicit decline, no-fit, unable to reach after full sequence, or competitor win.

Required fields:

- Outcome date
- Lost reason code (if Lost)
- Bound premium (if Won)

Auto-actions:

- Won: trigger onboarding/checklist
- Lost: move to nurture/reactivation pool if eligible

#Transition Rules (Guardrails)

- New -> Contact Attempted: only after outbound event logged.
- Contact Attempted -> Engaged: only on two-way interaction.
- Engaged -> Quote Ready: only when required intake complete.
- Quote Ready -> Proposal Sent: only when quote/proposal actually sent.
- Proposal Sent -> Won/Lost: only with explicit outcome event.

Disallowed shortcuts:

- New -> Quote Ready (without intake)
- Contact Attempted -> Proposal Sent (without engagement/intake)

#SLA Targets (Pilot)

- First response: <= 30 min (business hours)
- From Engaged -> Quote Ready: same day target
- From Quote Ready -> Proposal Sent: <= 24h
- Proposal follow-up: within 24â 48h

#Ownership Model

- Automation owner: first-touch + follow-up attempts
- CSR/Agent owner: intake completion + data quality
- Producer owner: quoting/proposal/close

#Required Reason Codes (Lost)

- Price
- Coverage mismatch
- No response
- Timing
- Not eligible
- Chose competitor
- Duplicate/invalid lead

#Reporting KPIs

- New -> Contact Attempted conversion
- Contact Attempted -> Engaged conversion
- Engaged -> Quote Ready conversion
- Quote Ready -> Proposal Sent conversion
- Proposal Sent -> Won conversion
- Cycle time by stage
- Lost reason distribution

#Pilot Notes

- Keep statuses strict; avoid ad-hoc custom status proliferation.
- Weekly audit of records with missing required fields.
- Enforce compliance suppressions before every outbound action.
